

LEGAL EASE

Brainstorming and Ideation Phase

Project Objective: To develop a simple and user-friendly platform that helps users understand legal information, identify common legal issues, and access basic guidance in an easy format.

1. Problem Identification

Many people find legal terms, procedures, and documents difficult to understand. They may not know where to start when they face a common legal issue. Legal Ease aims to make basic legal information easier to access and understand.

2. Brainstorming Ideas

- Simple explanations of common legal terms.
- Search facility for legal topics and questions.
- Step-by-step guidance for common legal procedures.
- Frequently Asked Questions (FAQ) section.
- Document and information checklist for selected legal processes.
- Easy navigation with a simple and clear interface.
- Links to reliable official legal resources.

3. Ideation and Selection

After discussing different ideas, the main features were selected based on usefulness, simplicity, accessibility, and feasibility. The proposed system focuses on providing general legal information rather than replacing professional legal advice.

4. Proposed Key Features

- **Legal Information:** Easy-to-read information about selected legal topics.
- **Search:** Helps users find relevant topics quickly.
- **Guidance:** Provides general step-by-step information for common procedures.
- **FAQ:** Answers common questions in simple language.
- **Resource Links:** Directs users to appropriate official sources when needed.

5. Expected Outcome

The brainstorming and ideation phase results in a clear project concept for Legal Ease. The system is intended to improve access to understandable legal information and help users identify useful next steps while encouraging them to consult qualified legal professionals for specific advice.
