

LEGAL EASE

Requirement Analysis Phase

Project Objective: To identify and analyze the functional and non-functional requirements needed to develop a simple, accessible, and reliable legal information platform.

1. Requirement Identification

The requirements were identified by considering the problems users face while searching for and understanding basic legal information. The system should provide information in simple language and help users find relevant resources easily.

2. Functional Requirements

- User should be able to search for legal topics.
- System should display simple explanations of selected legal terms and topics.
- System should provide general step-by-step guidance for common legal procedures.
- System should provide a Frequently Asked Questions (FAQ) section.
- System should provide links to reliable official legal resources.
- System should allow users to navigate between different legal information sections easily.

3. Non-Functional Requirements

- **Usability:** The interface should be simple and easy to understand.
- **Performance:** Search and information display should respond quickly.
- **Reliability:** Information should be presented consistently and responsibly.
- **Security:** User information, if collected, should be handled securely.
- **Accessibility:** The system should be usable by people with different levels of technical knowledge.

4. User Requirements

- Easy-to-use interface.
- Simple and understandable legal information.
- Quick access to relevant topics.
- Clear guidance and useful resource links.
- Clear indication that the platform provides general information, not a substitute for professional legal advice.

5. Hardware and Software Requirements

- **Hardware:** Computer or smartphone with internet connectivity.

- **Software:** Modern web browser and the technologies selected for developing the Legal Ease application.
- **Database:** A suitable database or structured data storage system, if required.

6. Expected Outcome

The requirement analysis phase provides a clear foundation for designing and developing Legal Ease. The identified requirements help ensure that the final system is simple, useful, accessible, and focused on providing general legal information responsibly.
